

SUPRA-SK

APPLICATION

For hand-operated percussion drills and drills up to 1300 watt with mounting thread and taper mount.

TYPE

Impact-resistant and self-clamping flat jaw drill chucks. Suitable for counterclockwise rotation by locking mechanism.

CUSTOMER BENEFITS

- ⊕ Concentricity of up to 0.25 mm
- ⊕ Increase in the clamping force proportional to the cutting force by automatic reclamping function and no releasing in counterclockwise rotation
- ⊕ Impact-resistant by locking mechanism for universal use

TECHNICAL FEATURES

- Strong retaining ring
- Functional components made from steel
- Hardened and ground
- Suitable for counterclockwise rotation up to maximal 15 Nm
