# CONSTANT FACE DRIVERS

The Constant face drivers of RÖHM are optimally suited for the rational turning and milling of workpieces over their entire length. All Constant face drivers are developed according to the modular principle, so that a universal exchange of a large multitude of driver discs and centre points is possible.

## ADVANTAGES AT A GLANCE

- ⊕ Maximum flexibility thanks to the modular principle
- ⊕ High concentricity thanks to narrow tolerances
- ⊕ Constant clamping force thanks to mechanical or hydraulic pressure compensation, even for uneven workpiece faces
